

McCloskey International Set to Showcase New Compact Crusher range at Intermat 2018

Peterborough, ON – 13th April 2018 – Intermat visitors will have a chance to view the most recent addition to McCloskey International’s product portfolio, the I34R compact impact crusher, during Intermat Paris, 23-28 April 2018. This exciting new highly mobile machine will be on display outside the entrance to Hall 6 for the duration of the show.

CEA UK Pavilion - Stand No. 6E024

Inside Hall 6, McCloskey International will have a booth on the CEA UK Pavillion, where the sales team look forward to meeting and greeting new and existing customers from France and around the world. They will be assisted by representatives from their two French dealers, Cimme Sodimat and Groupe Garonne.

Intermat 2018 is seen as the perfect opportunity for McCloskey International to show the I34R on the International stage, having launched it initially at Steinexpo, Germany last year. The I34R is the first of a series of compact crushers designed to deliver high performance and expanded versatility. These new crushers are able to nimbly move around in confined spaces and can continue moving whilst crushing. Their small footprint is uniquely suited to the demolition and asphalt recycling industry, aggregates and smaller scale construction projects. At less than 2.5m wide, the I34R can be transported easily between sites. The new crushers also boast flexibility, with standard machines converting to recircs in just a few hours. The new line of compact crushers shares many of the same features as their full-size family

members, including full colour screens, open engine compartments for ease of maintenance and also ease of use, through less complexity of the electrical drives and clutch system. McCloskey representatives and dealers will be on hand to discuss the features and benefits of this popular new machine, as well as the rest of their product range.

Over the past twelve months McCloskey International has continued to add new international dealers across all regions, which has fueled the company's growth in production and sales. The sales team is very interested to meet potential new dealers from the African region who will be in attendance at the Intermat 2018.

Dealers in France:

Cimme Sodimat, 59113 Seclin: www.cimme-sodimat.fr

Groupe Garonne, 31220 Mondavezan: www.groupegaronne.fr
